RESULTS IN MAINE

THREE Republicans of the country have small cause to congratulate themselves on the result of the election in Maine. One of the rock-ribbed Republican states of the union the G. O. P. has carried it by a comparatively small margin. If the result in Maine is to be taken as an indication of conditions in the rest of the country, the Republicans might as well prepare for a landslide for Wilson. The Democrats did not expect to carry Maine. Nevertheless they carried the state into the enemy's camp and polled a very large vote. This is what should be done in every state, in every county and every precinct. An aggressive fight from the beginning, taking no quarter and giving none, is the thing that will win for the Democrats.

THE MEXICAN SITUATION

It is not too soon to ask whether persons of any permanent value can be induced by the American Mexican commissioning how to secure in New Mexico, Colorado, to consider what old means of bringing order out of chaos in Mexico. Secretary Lane of the Interior Department, Judge Gove and John G. Mohr are all feed heading now and will doubtless approach in a practical manner the motions submitted to the committee for consideration. The withdrawal of American troops from Mexico, and the status of the border on this side of the Rio Grande will probably be considered from all possible standpoints. It is likely that a recommendation will be made that our troops be withdrawn from Mexican territory.

Notwithstanding the fact that conditions in Mexico are more favorable for peace than they have been for many months, it would be unwise to precipitately reduce the number of troops now camped on the American side of the international boundary line. No one can predict what may happen and raids on unprotected American territory are dangerous affairs, to say the least.

The joint commission may accomplish something definite, looking toward the resumption of operations by foreign mining and milling companies in Mexico. If sufficient protection could be assured for the property and men involved, the various properties would probably resume at once.

It is doubtful, however, if anything of real importance can be accomplished by the commission looking toward a solution of the Mexican problem—go problems. The solution must come from within Mexico—and not from without. It is up to the Mexican people themselves, and perhaps after years of war, they will set down to business and undertake reforms that will convince the world a dozen years

hence that the revolutions and incursions were not in vain.

PINCHOT SUPPORTS HUGHES

GEORGE E. PINCHOT backed his office as Forester of the United States Forest Service during a Roosevelt administration, is not with a circular letter giving his reasons why he is going to support Charles Hughes in the presidential campaign.

Pinchot's announcement that he is for Hughes will doubtless be gratifying to Hughes. It will mean no more vote for the Republican candidate beyond that Pinchot's support will be worth nothing. He may as well save postage stamps used in mailing out his circulatory letters.

The former forester attacks Wilson because of his inconsistent attitudes on various public questions, but his attack is a mere collection of platitudes—a string of adjectives and adverbs—which might have been well enough for service in the Bullinger-Pinchot scrap during the Taft regime—but are of no weight when offered as logical arguments for or against any specific proposition.

Giff has been trying to break into the limelight for a long time. He has been trying to "come back." But he doesn't know how. We respectfully suggest that he place his fifteen million dollar fortune out of interest and get a job teaching woodcraft. He demonstrated his ability in public office when he was dismissed as timberman.

VALENCIA COUNTY

CLOSELY following authentic news of a revolt in the Republican stronghold in Mori county, comes a report from a very reliable source in Valencia county that the Republican voters in that county are tired of being base chidren, tired of everlasting gang rule, and that the G. O. P. from Los Lunas to San Ysidro is split wide open in a sectional fight. For years without number, the River of Valencia was counted upon to return a Republican majority which could almost be depended upon to win any occasion of emergency. The voters have finally come to realize the value of the independent ballot, and they may be depended upon to the coming election to touch the bases a valuable lesson. The voters of Valencia and Socorro counties realize the power that would be held by Frank A. Hubbard, if elected to the United States senate. They do not propose that he be vested with that power.

The voters of Valencia want for candidates for office the men of their choice—not perpetual office seekers whose ambitions are dictated by the machine. The revolt in Valencia is significant. The Republican bases may believe they will be able to fix broken fences between now and election day. But they will discover that they have worked the game in Valencia in a way that will re-set with a vengeance.

SCHOOL UNIFORMS

THE Kansas City Board of Education is facing the adoption or rejection of a resolution requiring girls attending the public schools of that city, to wear a uniform style of dress. Desire on the part of some girls to dress better than others, leading to extravagance on the part of those whose parents cannot afford fancy dresses for every day in the week is given as one of the principal reasons in favor of the passage of the resolution. It can be said that the resolutions, in all probability, will not receive the sanction of the board. Uniform style of dress is possible in a

girls' boarding school, but would be a distinct failure in a public school. The reason is that the girls themselves would be opposed to such a rule. This is sufficient to defeat the resolution.

BENJAMIN H. BURTON has been mayor of Socorro his home town for ten years. His only ever heard of Burton doing anything worth while for Socorro?

MAINE ELECTION

AN analysis of the unofficial vote in the Maine election today shows that Shirkon, the Republican candidate for governor received a total of 10,982 votes, against 26,254 for Chavis. The significance of the Mittimus voters can only be interpreted, when it is known that in 1908 Taft carried Maine by 20,884, and in 1912 by 36,867 plurality. The Republican candidate for senator won in Maine yesterday by figures which cannot be received by the G. O. P. with any great show of elation. The congressional fight was so close that it was uncomfortable for the Republicans.

If the Democrats can hold their own in other states like they did in Maine yesterday, there need be no cause for worry. There are twelve pivotal states in the fight this year, with New York, Ohio, Illinois, New York and Missouri the principal prizes.

It is true that the campaign now is difficult to analyze and understand, even by the politicians who have their finger on the pulse of things.

But the people are with the Democrats and for Wilson. Nothing indicates this more directly than the result in Maine yesterday.

PECOS VALLEY CLIMATE IS TO BE ADVERTISED THROUGHOUT THE EAST

Roswell, N. M., Sept. 11.—Progress has practically completed a fund of \$1,000 for advertising the climate in the east, a committee composed of D. W. Low, Albert H. Tracy, J. J. Jaffee, H. P. Sanders and Mr. Ahnerman has been at work on this plan, and now the completion of the amount is in sight.

If it is a comprehensive campaign which this committee has undertaken, the author of this article includes the raising and spending of the money but it will solve the problem of advertising suitable accommodations for the visitors who come. The whole plan will be outlined at once, and the committee, which already has planned the advertisement that the fund has been practically completed, seems to insure the hearty cooperation of the citizens of Roswell.

This is the first time Roswell has ever advertised its climate. In fact it is the first time the city as a whole has ever undertaken any comprehensive advertising. Because of the excellent training schools surrounding Roswell this has always been passed in the front and the climate unknown.

Roswell will pursue strenuously this same plan that Albuquerque and Silver City have used in getting the tourists about Roswell before the people of the east. It is believed that the results will be very satisfactory to the visitors in this field. The committee has made no definite announcement as to its plans of providing accommodations and amusement for the people who come on account of the climate.

Instead of the thousands of ugly, amanita-looking men, women and girls with puffy or mousy complexions; instead of the multitudes of "neve wrecks," "grandmamas," "beam fags" and pessimists we should see a smile, optimism, throng of rosy-cheeked people everywhere.

An inside bath is had by drinking a glass of red hot water with a teaspoonful of limestone phosphate in it to wash from the stomach liver, kidneys and ten yards of bowel the previous day's indigestible waste, sour fermentation and poisons thus cleaning, softening and loosening the entire alimentary canal before putting more food into the stomach. These subjects to sit beside the billious, watery, smooth, complexioned, pale, and nervous, those who have a rapid, shallow breathing and who are constipated, are often so cured to obtain a perfect condition of bone, skin, phosphate at the dining table, it will not cost a cent but is sufficient to demonstrate the quick and remarkable change in both health and appearance of visiting cases who practice intestinal sanitation. We must remember that muscle relaxation is more important than muscle tone because the body does not absorb nutrients to contract the mind while the body in the mind's rest of nerves does.

Hopes Women Will Adopt This Habit As Well As Men

Glass of hot water each morning helps us look and feel clean, sweet, fresh.

Happy, bright, alert—vibrant and vivacious—a good clear skin, a natural, rose complexion and freedom from illness are assured and by clean, healthy blood. If only every woman and likewise every man would realize the wonders of the morning inside bath, what a gratifying change would take place.

Instead of the thousands of ugly, amanita-looking men, women and girls with puffy or mousy complexions; instead of the multitudes of "neve wrecks," "grandmamas," "beam fags" and pessimists we should see a smile, optimism, throng of rosy-cheeked people everywhere.

Henry hands baggage and all other things;

He comes at your calling as bags on their wings;

His motto is promptness; his service is fine;

Whenever you want him just phone NINE-THREE-NINE.

Imports should come from makers who are only certain to choose. For more detail information, consult Burroughs' Importers' Guide, at all drug stores. Price, \$1.00.

BUSINESS MEN OF ROSWELL BACKING ROAD BOND ISSUE

BOOSTERS of the Pecos Valley Metropolis are planning to vote \$100,000 to improve highways of Chaves County.

Roswell, N. M., Sept. 11.—One of the big surprises of the political campaign was the resignation yesterday of J. L. O'Dell, who was a candidate for the legislature. The legislature seats are active campaign for the purpose of the democratic group and received a good vote. He gave as his reason for resigning that the safety of his family would not permit of his being away from Roswell to attend the legislature. The reason will be tried by the democratic convention.

The Republicans nominated one candidate for the legislature. A. Strickland. He is a capable man and a likable young friend. It is suggested that the Republicans make their case so that all the Democrats who attended the Democratic session will vote for the candidate on the Republi-

cans' side.

Both parties have been holding meetings in the past two weeks and both have made a determined effort to establish good roads, which would be of benefit to the county. This would also allow time to go to the state to see what can be done to help the county.

The state highway fund is being spent on the road going west from Roswell and when it is finished will be one of the best highways in the state. With these additional roads which would be possible under one bond issue, the county would be in a network of good roads, which is thought would aid greatly in the development of all parts of the county. It is thought that the cities of the county would like to be interested in favor of issuing the bonds.
